

ONLINE COBRA ADMINISTRATION

Mongoose[®]

COBRA REQUIREMENTS ARE MORE COMPLICATED THAN MANY EMPLOYERS REALIZE. THEY CAN EXPOSE EMPLOYERS TO COSTLY PENALTIES AND LIABILITIES.

The IRS claims that more than 90% of employers are out of compliance with COBRA regulations. Penalties can be significant and the active enforcement of regulations has increased in recent years. COBRA administration requires substantial administrative investments. When you factor in the software systems, hardware systems, labor costs, legal fees, postage, telephone and internet support required for participant notifications, billing and collection of premiums, reporting, accounting, and distribution of premium to carriers, it seldom makes sense to administer COBRA in-house, especially considering the audit and legal risks.
